# PRIYANSHU SHARMA

University of Petroleum and Energy Studies

(+91) 9680180882 sharma29priyanshu@gmail.com LinkedIn

Jaipur, Rajasthan, India

## Education

**University of Petroleum and Energy Studies, Dehradun** — **Aug 2022 – Present**

*Bachelor of Technology in Computer Science* — *CGPA: 7.00/10*

**St. Xavier's School Nevta, Jaipur** — **Mar 2016 - May 2022**

*Intermediate in PCM* — *80%*

*High School* — *84%*

## Technical Skills

**Languages**: C++, Python, Java, JavaScript, HTML, CSS

**Frameworks & Tools**: Node.js, OpenGL, MongoDB, Git, VS Code, PyCharm

**Databases**: SQL, NoSQL, MongoDB

**Concepts**: OOP, Data Structures & Algorithms, DBMS, OS, Computer Networks, Agile

## Projects

**Air Quality Index (AQI) Comparison App** | *React.js, Chart.js, Framer Motion, OpenWeather API* *Link* ***Aug 2025 – Oct 2025***

- Developed a modern web application to compare real-time air quality levels between global cities using OpenWeatherMap API.
- Implemented dynamic visualizations with Chart.js and Framer Motion for interactive AQI and pollutant trend analysis.
- Designed a glassmorphic, responsive UI with smooth animations for enhanced user engagement and mobile compatibility.
- Added history tracking and local data caching to enable comparison persistence and offline accessibility.
- Deployed the project on Render with GitHub CI/CD integration for public accessibility and version control.

**HealthBot – AI for Early Disease Detection** | *Python, Flask, scikit-learn, React.js* ***June 2025 – July 2025***

- Designed an ML pipeline for symptom-based diagnosis with severity scoring and confidence metrics.
- Integrated responsive React frontend with Flask backend for seamless interaction.
- Provided disease description, severity level, and precautions via a chatbot interface.

**Smart Parking Management System |** *C++, OpenCV* ***Jan 2025 – May 2025***

- Developed a real-time smart parking system using C++ and OpenCV to detect vehicle presence with contour detection and thresholding techniques.
- Integrated LED indicators (green/red) to visually represent slot availability for users.
- Applied modular design and followed Agile methodology for iterative development and testing. Achieved accurate detection with optimized frame processing for live camera input.

**Learning Management system portal** |*Java, Node.js, OpenGl, MongoDB* ***Aug 2024 – Dec 2024***

- Built a unified Learning Management System using Java, Node.js, MongoDB, and OpenGL.
- Enabled streamlined attendance, scheduling, and learning material distribution for 50+ users.
- Designed and tested intuitive UI with real student/teacher feedback, improving usability by 30%.

**Bakery Website** | *Python, HTML, CSS, Javascript* ***Jan 2024 – May 2024***

- Developed a user-friendly bakery website with login functionality, real-time product inventory display, and online ordering using Python, HTML, CSS, and JavaScript.

## Certifications

- **Certificate of Internship by DMSHAO Technologies- June 2024 - July 2024**
- **Microsoft: Career Essentials in Data Analysis – July 2025**
- **Google: Analytics Certified Badge – July 2025**

- **IBM: Introduction to Open Source & Open Source Foundations Badge – July 2025**
- **Accenture: Software Engineering Virtual Experience – July 2025**
- **Electronic Arts: Software Engineering Job Simulation – July 2025**
- **HackerRank: Python (Basic), Problem Solving (Basic) – July 2025**

## Experience

**Summer Intern – IBM** ***June 2025 – July 2025***

- Developed HealthBot, an AI-powered disease detection tool using Python, Flask, scikit-learn, React.js.
- Trained a Decision Tree model (132 symptoms, 41 diseases) achieving 97.56% accuracy.
- Built REST APIs and responsive chatbot UI for real-time predictions and health advice.

**Software Development Intern – *DMSHAO Technologies*** ***June 2024 – July 2024***

- Gained hands-on experience in Python scripting for automation and industrial applications.
- Contributed to multiple real-world development tasks under supervision.
-

**Community Intern – *Yuva Sathi Sangathan*** ***May 2023 – July 2023***

- Participated in city-wide cleanup drives and coordinated community engagement activities.

## Leadership & Extracurricular

- Led IBM internship team in developing HealthBot, an AI-powered disease detection system achieving 97.56% accuracy.
- Completed a two-month internship at DMSHAO Technologies, applying Python in industrial automation tasks.
- Volunteered with Yuva Sathi Sangathan for citywide environmental cleanup campaigns.
- Attended IBM sessions on Machine Learning, gaining insights into model training and real-world applications.
